

# Leaders at the intersection of business and artificial intelligence

## About AI Connect

ChatGPT and similar breakthroughs have captured the world’s attention, placing AI squarely on board agendas. Yet few companies and fewer boards are well prepared for rapid, large-scale AI adoption. Clifford Chance and Tapestry Networks launched the AI Connect Forum in 2023. Its mission is to provide directors and executives from leading companies with a safe space to engage on AI’s strategic implications and the social, ethical, policy, and governance concerns it presents. Interviews and small-group discussions have evolved into a network of corporate leaders and experts, eager to explore how to deploy AI technology strategically and responsibly.

The AI Connect Forum aspires to become the definitive collaboration platform on AI for leaders of the world’s foremost organizations, enabling them to learn, to shape solutions, and to connect with one another and with top experts. The core focus of AI Connect is boardroom issues: corporate strategy, governance, policy and regulation, and the social and economic impact of AI adoption.

## The Future of AI Connect

In 2024, we plan to bring directors and c-suite executives together in two meetings, one in the US and one in Europe, and a global summit, the platform’s flagship event. We will delve more deeply into issues like emerging applications and their implementation, AI ownership and oversight, and the response to potential regulation. Meetings will be supplemented by content to capture insights, develop recommendations, identify best practices, and deepen engagement between sessions.
